## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Wolf (Bead cellulose products with film formers and solubilizer for controlled drug release, Published 1997).

Wolf teach a, " Flowable bead cellulose (BC) coprecipitates were prepared for controlled release, consisting of spherical BC as carrier, the film former hydroxypropyl methylcellulose (HPMC), the hydrophilic solubilizers polyethylene glycol 6000 (PEG 6000) or Poloxamer, the plasticizers dimethyl phthalate and dioctyl phthalate and the model drugs prednisolone and griseofluvin." (See abstract). The Poloxamer is Pluronic 6800. (See page 98, column 2, Lines 13-14). In preferred embodiment of a two-step preparation BC:Poloxamer:HPMC:prednisolone was prepared with a ratio of 1:1:0.5:0.1 and 1:3:0.5:1 by freeze drying. With regard to the glass-transition temperature of the particle and drug it is the Examiners position that such is an inherent property of the product. Furthermore, with regard to the instantly claimed MDC, AUC, Cmax and bioavailability values of the particles, it is the Examiners position that such values are inherent properties of the product. Since the instant product and the prior art product are structurally indistinguishable, it is the Examiners position that the properties would be

inherent to the product of Wolf. For the foregoing reasons the instant claims are anticipated by the prior art.
